Table of contents

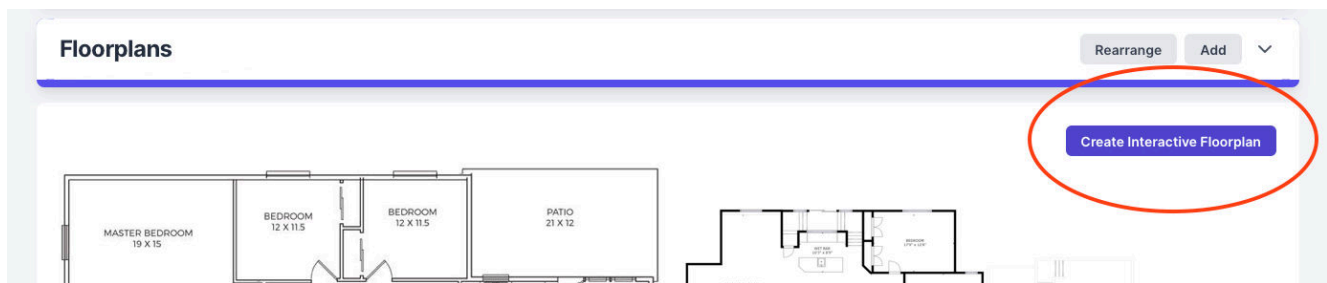

Overview

Aryeo's **Interactive Floor Plan Builder** allows you to pair listing photos with floor plan images to create an immersive, clickable experience for your clients. This feature helps buyers visualize the flow of a property and adds extra value to your property websites.

How to Create an Interactive Floor Plan in Aryeo

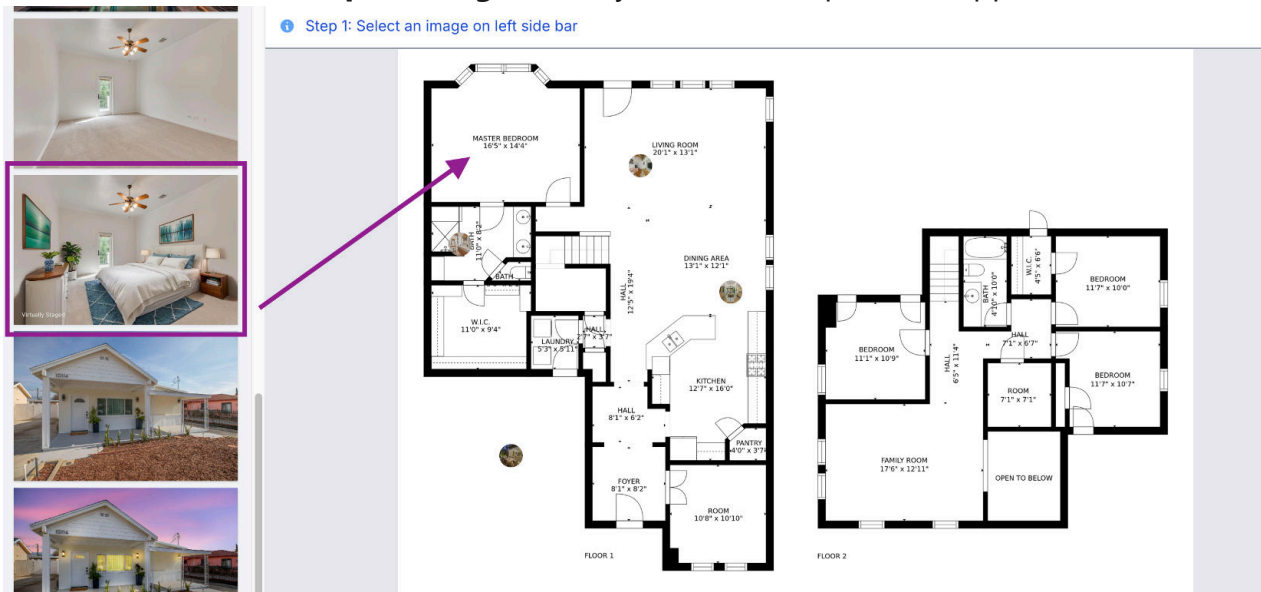

To begin, make sure you've uploaded both **photos** and **floor plan images** to your listing.

1. Go to the **Listing page** for the property.
2. Scroll down to the **Floor Plans** section and click the dropdown arrow.
3. Click the **Create Interactive Floorplan** button.

Once the editor opens:

- On the **left sidebar**, select a photo you'd like to place on the floor plan.
- Then **click on the floor plan image** where you'd like that photo to appear.

Editing or Removing Photo Markers

Need to make adjustments?

- **Move a photo marker:** Click and drag it to a new location.
- **View or delete a marker:** Click on it to preview the image or remove it from the floor plan.

This makes it easy to fine-tune your layout as needed.

Viewing the Interactive Floor Plan on the Property Website

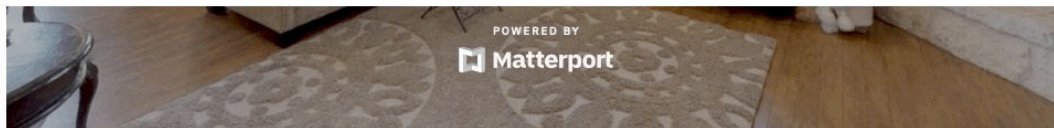

Once saved, your interactive floor plan will be live on the property website. Here's how it works:

- Hover your mouse over a **photo marker** to see a preview of the associated image.
- Click outside the image preview or press the **"X"** to close it.

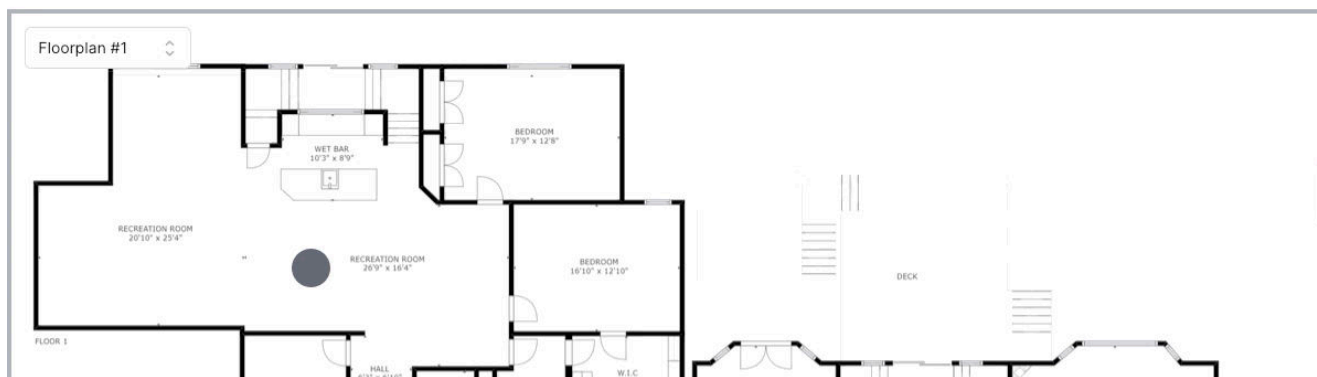

This interactive feature creates a dynamic, intuitive browsing experience for potential buyers and clients.

FAQ

Q: Can I use multiple floor plan images in one listing?

A: Yes! You can add multiple floor plans and place photos on each of them.

Q: Can I change the image order or layout after publishing?

A: Yes, you can return to the editor anytime to move or remove placed photos and re-save.

Q: Will Aryeo interactive floor plans work on mobile?

A: Yes, they are fully responsive and work on both desktop and mobile versions of the property website.
